#### The District's Roads.

To the Editor of The Star: Kindly allow me space for a correction as to your editorial of March 19, entitled "The District Roads." which is apt to produce some incorrect impressions. First. The fire engine was en route to a fire at Chevy Chase lake, two miles bevond the District line, and was stuck in the mud of Montgomery county, not The statement that "Outside

of the parks there is only one first-class road within the District" is equally mis-The better constructed roads are nearly all outside of the parks. The latter seem better, not altogether because of the excellence of their construction, but because the grinding traffic of heavily wagons is not permitted upon them to cut and crush the surface. Fourteenth street extended, the Military road. road, Benning road, Sheriff road, Kenilworth road, Good Hope road, Nichols Livingstone road, nearly forty miles of the main arteries of travel the farm and garden products we use, drained, sustain a heavy commercial and pleasure traffic, and are roads on which its full speed without obstruction due to the defects of the road at all seasons. There is in wet weather a little unavoidable sloppiness on some of the most traveled, but no mire ruts nor holes. These are not all wide roads, but they accommodate the traffic.

Besides these, we have many more miles of less traveled macadam roads and good graveled roads which are in good condition for travel all the year, and numerous shorter streets, sustaining heavy wear, most of which are kept in a fair state of repair.

Every road or street outside of the original boundary of the city at Florida avenue is classed as a "county road." There are over one hundred and sixty miles of these roads, a large proportion of which are improved and are kept in repair. Unfortunately, also, we have a considerable number of unimproved streets, with scattered buildings and little travel, for the improvement of which no funds have ever been provided. The cost of improving these is in many cases not yet justified by the necessity for it; but their condition is necessarily bad in wet weather.

We are constructing well-built new roads in the District at the rate of about \$150,000 per annum, exclusive of asphalt We also expend about \$100,000 per annum for repairs to county roads, including sprinkling. The rate of wear on the principal roads has largely increased in the last five years, due to the use of automobiles at high speed. When it is considered that the amount appropriated for repair must maintain ever 160 miles of road in passable order at all times, besides taking care of the drainage conditions and safety of unimproved streets and alleys, it is not to be wondered at that a few comparatively little-traveled roads will occasionally de L. During her conversation at the hospital vesterday afternoon Mrs. Carey indicated a desire to see her husband, who is employed in New Orleans. He was away from the city yesterday when the police sent him a message telling of his wife's conduct, but probably received the news last night. Mrs. Carey hardly expects her husband will make the journey here to see her. She does expect he will render her assistance.
